Work Experience: 6 months – Traffic manager

Dear Mr DOUGLAS

I am 25years old and I am currently studying for a diploma in IT at a computer engineering school (EPSI) in Paris.

As part of my studies I must do six months work experience in IT between June and September 2011 I am very keen to work for an international firm and broaden my experience.

I would like to join your team because is exactly what I want to do in my career: traffic manager in internet. I have more than 5 years experience in this part of IT and I read all the book about GOOGLE.

As you can see from my attached CV, I already have experience in the IT sector and I am now particularly interested in getting a wider range of knowledge in web site creation, sales or client contact and problem solving.

My previous work experience in computer science, but also working on a campsite four summers running has given me confidence and improved my language skills. I get on well with people and am sociable. I am a keen tennis player and swimmer.

I would be pleased to discuss my project with you in more detail in an interview and I look forward to hearing from you.

Sincerely

Damien DELEMARLE
